

## LitePAC

The catheter for all your 0.014" peripheral applications

### NOW WITH 220MM LONG BALLOONS

The LitePAC 0.014" Rapid Exchange PTA Catheter has an overall length of 150cm and mounted on a hypotube platform.

The LitePAC is designed for multiple applications including below the knee PTA and is also suitable for pre and post-dilation during stent procedures.

LitePAC features a hypotube shaft to give high pushability and a low profile for easy entry into lesions. The highly durable Quadflex balloon makes the LitePAC suitable for use in highly calcified lesions. The device is compatible with 0.014" guidewires and devices such as distal protection filters.

### LitePAC™ Product Features

- Rapid Exchange Design
- Compatible with 0.014" guidewire and distal protection devices
- Rated burst pressure - 16Atm (3mm-4mm)
- 12Atm (5mm-7mm)
- Overall catheter length 135cm
- Hypotube 2.16F
